

EUROPEAN PREMIUM SECURITY & SMART SOLUTIONS

Safety | Comfort | Quality | Remote access

JABLOTRON
CREATING ALARMS

JABLOTRON 100+ security system

This professional security system protects you not only against thieves, but also against fire, flooding or a gas leak and is also able to control the heating or for example open your garage door.

Thanks to the wide range of detectors, it can flexibly adapt both to the security requirements of households and also to specific demands of large companies. The system can be upgraded any time in the future. You can have up to 20 segments used to control the individual sections on your keyboard.

190+ PRODUCTS

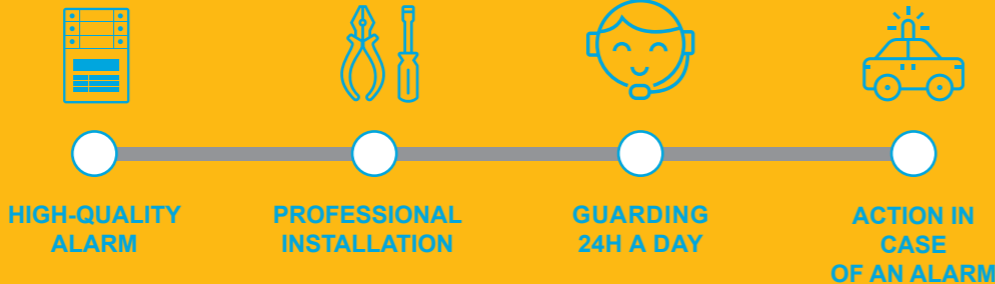

The wide range of wireless and bus features allows for building-friendly installation at an affordable price. Furthermore, it is possible to freely combine these two connection options together.

GUARDING 24H A DAY

The JABLOTRON 100+ system can be connected to a monitoring and alarm centre where operators evaluate reports from the alarm 24 hours a day and if necessary send out an intervention team to the guarded building.

Four steps to security

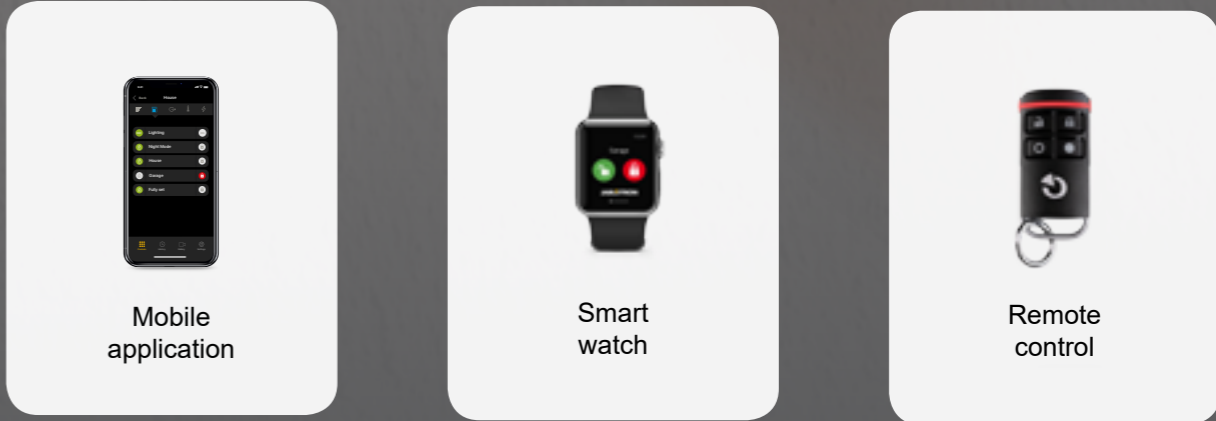

Intuitive two-button control

The JABLOTRON 100+ system is so easy to control that you will manage it with your weekend shopping in your hand. All you need to do is to press the button of the respective segment and authorize yourself. If you add for instance a garage in future, the number of segments can be extended any time without problems.

Control your home in other ways

Protect your house and family

Security alarm

Preventing break-ins

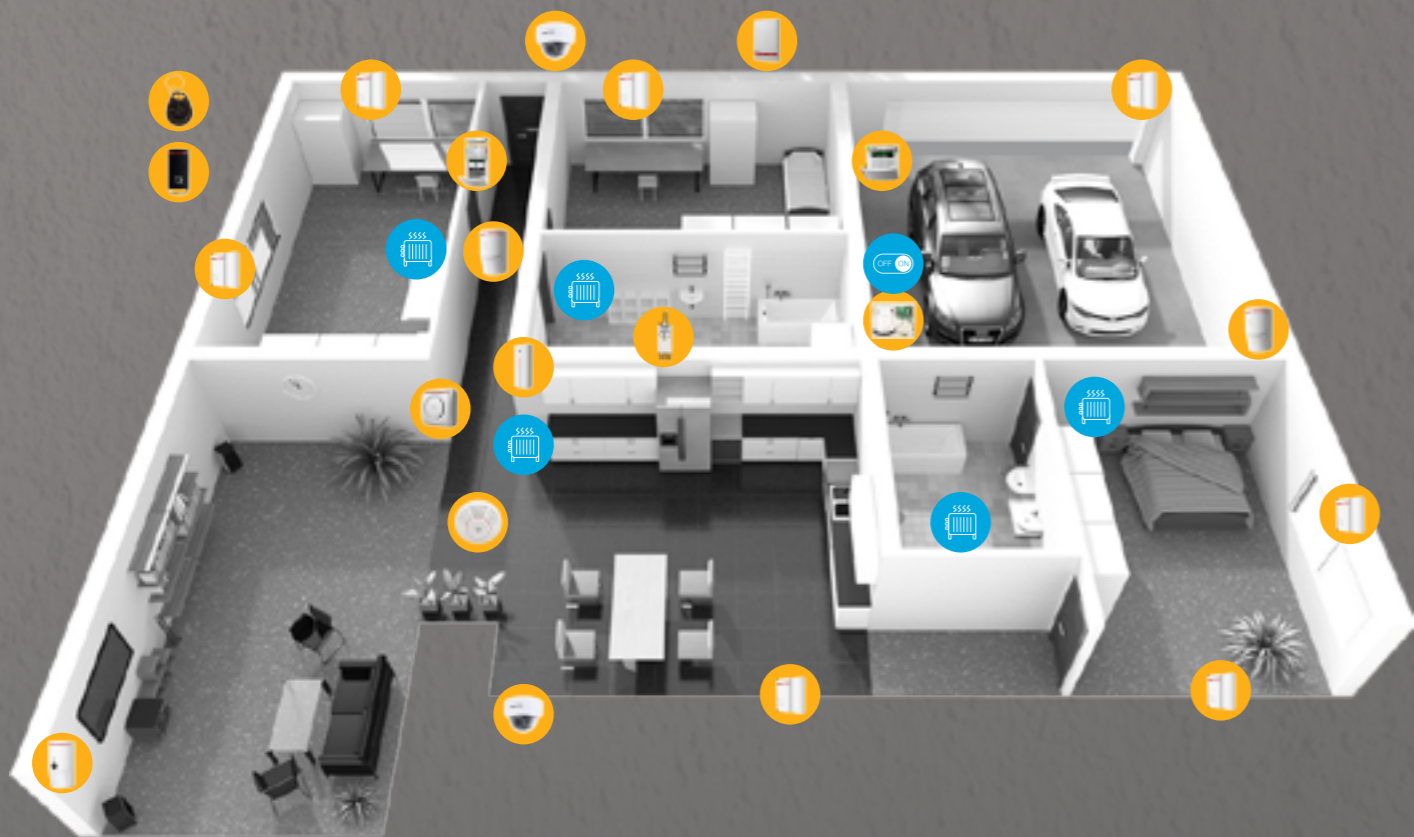

Emergency alarm

5-layers security system

Secured data

AUTOMATION

It enables control of lights, socket circuits, blinds as well as garage doors or pool filtration and lawn irrigation. The system also informs you in time that electricity consumption or temperature has been exceeded.

HEATING

A thermostat separately controls the temperature in each room based on specific programs. The settings can be changed any time, even remotely.

We will also protect you from the elements

The JABLOTRON 100+ will not only protect your home from thieves, but it will also notify you of imminent danger in the form of gas, fire or water.

FIRE

A sensor identifies smoke or an increased temperature in the room. The alarm immediately activates a siren and informs the Alarm Receiving Centre, which will summon the fire brigade.

You are immediately informed about every event with PUSH notification, an SMS message or call. The system informs the Alarm Receiving Centre at the same time.

CO GASES

A detector detects a gas leak and a siren warns you loudly before your health is put at stake.

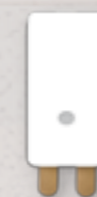

FLAMMABLE GASES

A detector is able to recognize the leaks of flammable gases such as natural gas, propane and butane. The system immediately triggers an alarm, closes off the gas supply and activates ventilation.

FLOOD

A detector registers a water leak and the system closes its supply. This way, possible flooding and bigger damage can be prevented.

Smart home with JABLOTRON

The JABLOTRON 100+ also provides smart functions that will make it easier for you and your wallet. Not only can you control individual devices from the same spot as the alarm, but you can also plan all actions in advance. And if you want to make your life as easy as possible, use one key to activate multiple related actions at the same time.

Switching socket circuits off

Heating control

Pulling down the blinds

Opening the garage

Switching on the lights

Lawn irrigation

Pool filtration

IP Intercoms

Smart solutions

Calendar: Smart schedule Day/night etc.

Smart company with JABLOTRON

The system will become your reliable assistant also for the control of access rights. You can assign rights to up to 600 employees either for the whole company or only parts of it. Besides the premises you can also exactly define the times when access to the company is provided. Easily configurable reports will provide you with a general overview of all accesses and used sections.

Do your business without worries

Control all the smart functions of the JABLOTRON 100+ from the same place as the alarm. You can remotely switch the heating on and off, lift the entrance gate by a short flash of the headlights or set automatic activation of the light on entering a room. If you want to make your business even easier, plan all repeated events in advance.

Minimal user interventions

Switching lights on or off

Detection of open windows

Temperature monitoring

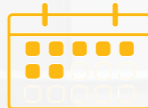

Heating control

Switching socket circuits on or off

Entrance gate control

Calendar-based activation of functions

No entry for unauthorized persons

JABLOTRON 100+ main components

CONTROL PANEL

The control brain that informs you about an alarm or about the return of the children from school. In addition, it manages the entire system based on your instructions.

FLOOD DETECTOR

It can register a water leak and inform you in time. In addition, the system will close its supply automatically to prevent bigger damage.

KEYPAD

It is used to set, unset and control devices from one point. Another keypad can be used to e.g. control the garage only.

INTERNAL SIREN

It sounds in case of an alarm, discouraging burglars and alerting the user. Besides, it also fulfills the function of a doorbell.

MOTION DETECTOR

It monitors motion in a room up to a distance of 12 m. On detecting a strange person it will trigger an alarm without responding to pets.

EXTERNAL SIREN

It informs the neighborhood about an intrusion into your house. You can choose the white, grey or stainless-steel color.

PHOTO-VERIFICATION MOTION DETECTOR

Besides an alarm, it also sends photos from the monitored location. This is to inform you exactly what is happening at your home.

CONTROL CHIP

It is used for simple and secure identification within the alarm control. This way, you know exactly who used the system and when.

GLASS FRACTURE DETECTOR

It is able to recognize the sound of breaking glass to trigger an alarm before a burglar gets into your home.

REMOTE CONTROL

It allows you to remotely control the alarm and all devices in your home. You can also use the same control for your firm.

OPENING DETECTOR

It guards windows and doors and if they are opened violently, it will trigger an alarm. Thus, it can keep guard over you even while you are sleeping.

VIDEO-VERIFICATION CAMERA

In case of an alarm, it sends a one-minute video from the guarded location. It allows you to see what the situation looked like before and after the event.

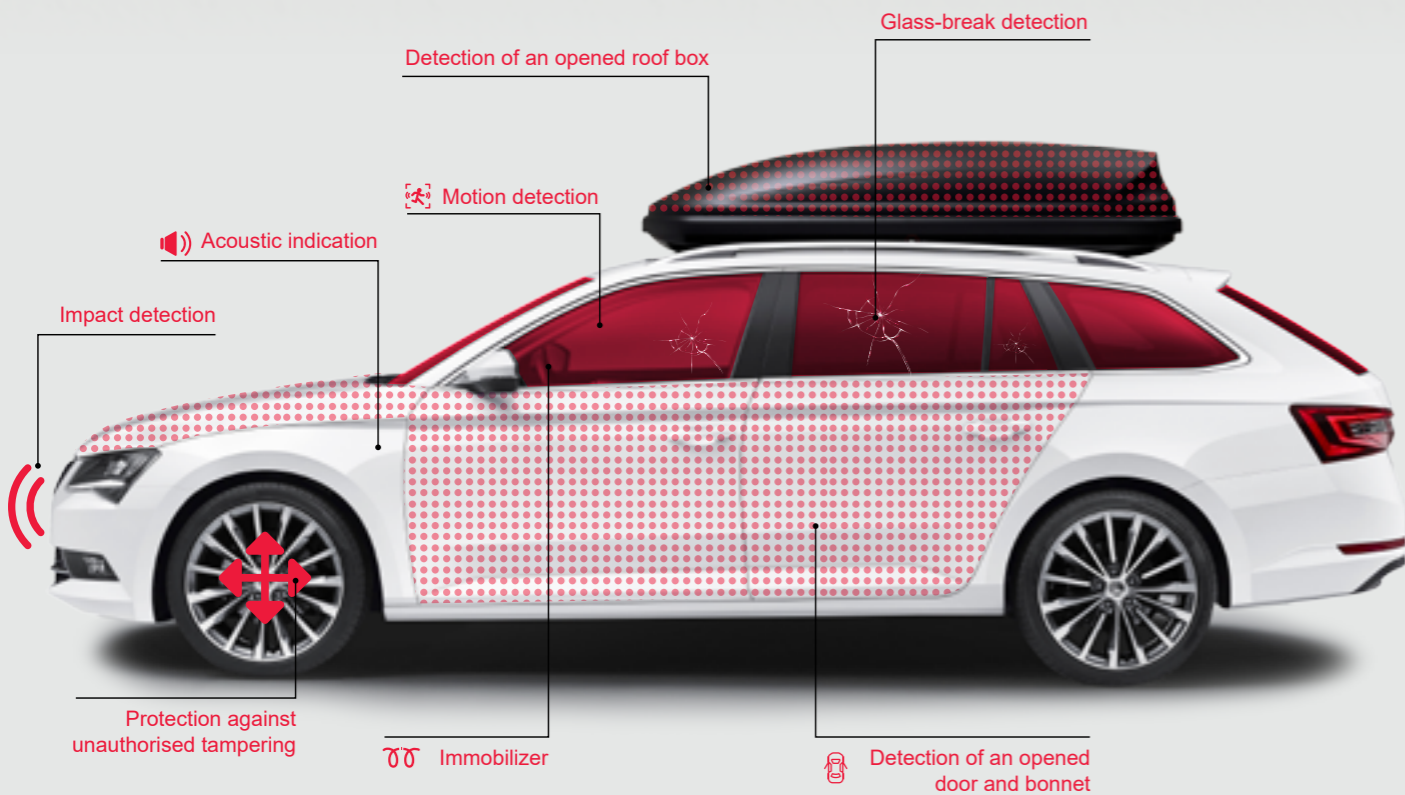

FIRE DETECTOR

It can recognize smoke or an increased temperature and warn you before a fire breaks out.

Car security and monitoring

The car alarm combines vehicle security, acoustic indication, an immobilizer and notification of an alarm via mobile phone. At the same time, it can distinguish exactly what happened and you will immediately receive information specifying the type and location of the alarm.

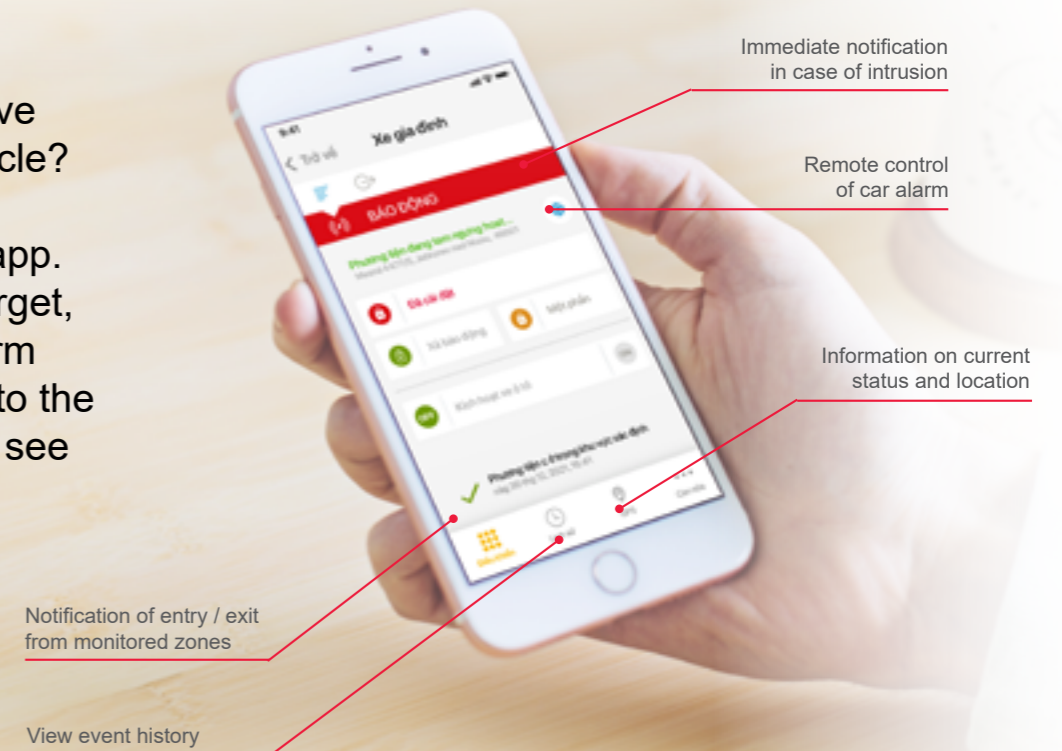

Other functions

- ✓ Notification of an unlocked vehicle
- ✓ Monitoring battery status
- ✓ Opening a garage by flashing the lights
- ✓ Independent heating control via the app

Operate your car alarm remotely

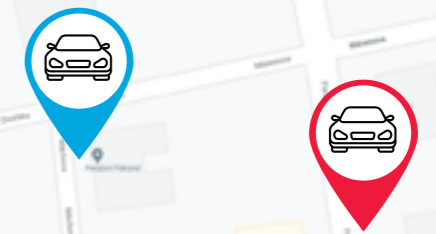

Not sure if you have secured your vehicle? Check using the MyJABLOTRON app. If you really did forget, simply set the alarm remotely. Thanks to the app, you can also see other details.

Monitor your vehicles on the road

Download the app for free 

Monitor your vehicles with our units effectively. The monitoring unit identifies the driver, switches between business and private trips and sends an emergency signal if problems arise.

-  CURRENT LOCATION
-  COST CONTROL
-  DRIVE HISTORY
-  DRIVER AND VEHICLE RECORDS

Become a JABLOTRON Partner

Keep up to date from anywhere with MyCOMPANY app

Make your work with clients easier. Thanks to remote access through our app, you can connect to any installed device. You will be able to manage operations remotely through the MyCOMPANY app and you will find everything by Jablotron in one place.

Partners support

TECHNICAL SUPPORT

You will have a team of trained and certified technicians behind you with the direct support of Jablotron Technical Support.

MARKETING AND PROMOTIONAL MATERIALS

We provide our distribution network members with a sophisticated set of marketing materials and promotional items enabling you to comprehensively present all key product features and benefits to your customers.

EDUCATION AND TRAINING

Expand your qualifications and go through a retraining course held by Jablotron Academy from home. You only have to watch the educational videos in the app and pass the final exam.

SPECIAL EVENTS FOR TOP PARTNERS

With our best installation partners we regularly meet at special events and occasions.

For more information see www.jablotron.com

Installation administration

You can now react to customers' requests remotely by using our app. You can easily change the settings of a device or add another user.

You will also see an overview of all your installations in one place. You can filter the information and show only, say, the alarms with a reported error.

Material database

Avoid piles of paperwork when looking for the right document. You will find everything in one place in the MyCOMPANY app. You will find anything from product brochures and advertisement leaflets, to manuals for the latest software.

Quote creation

Create your own template with a logo and contact details, add selected products and make a professional quote in a matter of minutes.

Free notification

You will have an unlimited overview of all installed devices thanks to PUSH notifications, emails or SMSes.
